Website Final Project

Name: Christian James J. Perez   Section & Year: 1 BSInfoSys A
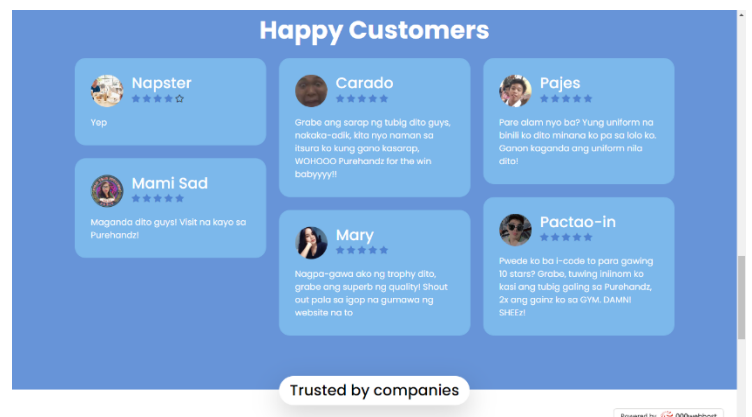

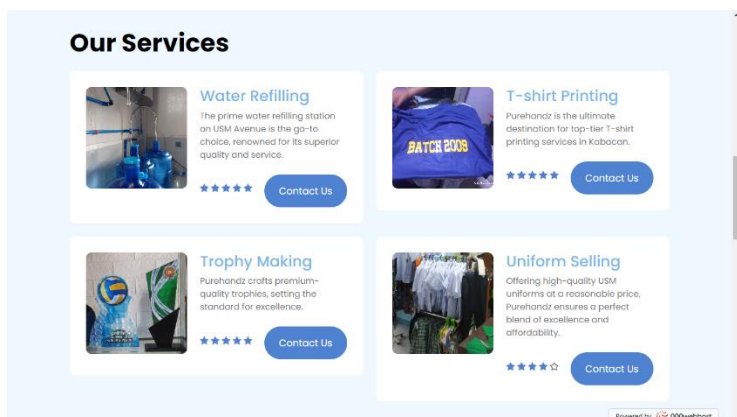

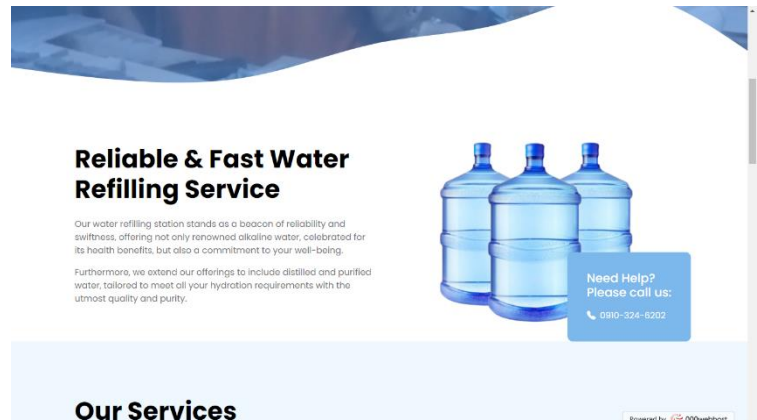

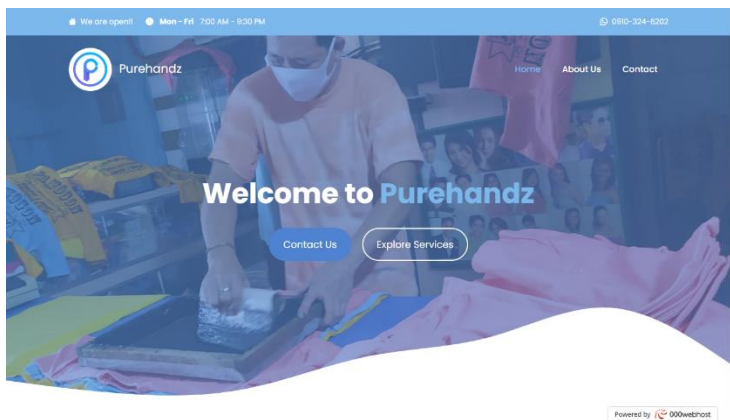

Title of my website: Purehandz

URL of my website: https://purehandz.000webhostapp.com/

URL of the GitHub repository: https://github.com/imaginarycjay01/IntroToComputing-Website-Project.git

Brief description about my website: "*Purehandz is owned by my grandfather. I am currently working part-time here while being a student, and they also compensated me for creating this website. While developing this website, I planned to keep it as minimal as possible and straightforward for a practical user experience. I also opted for a blue color palette to represent water since Purehandz has a water refilling station.*" – Me
